

Exhibit 1

“National Collegiate Athletic Association Student-Athlete Concussion Injury Litigation” Settlement

Malcolm Campbell

Phone number: 323.432.0279

Address: 5482 Wilshire Blvd. L.A., CA 90046

Email: **malcolm9100@gmail.com**

I, Malcolm Campbell OBJECT. What is this. If I knew what I know now, playing sports in the NCAA would have been different for me. The NCAA has misled me. Graduating from high school it's my dream to play for a D1 NCAA School team because NCAA sports teams get a lot of broadcast through TV. or even anywhere advertised. Graduating from high school, I wanted to be on ESPN playing on a top ranked NCAA basketball team. I attended NCAA D1, the University of Hartford in Connecticut (year 2007-2009), and NCAA D2, University of Alaska Anchorage in Alaska (year 2009-2010) on full basketball scholarships.

There are huge disadvantages to this sport attending to play for the NCAA that I was unaware of, before receiving this settlement notice. Upon signing scholarship papers for the NCAA, there should be a page in all NCAA scholarship papers when a player commits and/or signs with a University, so that the athlete is fully aware of what's long-term effects could possibly happen.

I have symptoms that are unexplainable, BUT thanks to the “National Collegiate Athletic Association Student-Athlete Concussion Injury Litigation” settlement. Most of my life during and after participating in the NCAA is explained in the “National Collegiate Athletic Association Student-Athlete Concussion Injury Litigation” settlement.

I was unaware of the injuries I experienced (a few listed below from doctors notes). Prior to playing for the NCAA being flown out on college visits, the facilities, and trainers looked assuring to me that my health will have top care. I question the NCAA if they have a rating scale to make a University NCAA bound. Are the facilities, and employees rated?

Or do they just become NCAA because the school deserves it. “Would you cross the street without looking both ways?” Well athletes such as myself only see one way when crossing that street. I see one goal (to win a basketball championship). I see one team (my team). Looking the other way now, it's impossible for me to have seen the aftermath prior to, or in present playing for the NCAA. I was only able to look one way when signing my NCAA basketball scholarships. How do I become aware of the aftermath.

Doctors notes explained:

(page 2)

Had pain in my ankle from working out (A lot of times, it doesn't matter how much there pain is felt on an area of the body, playing for an NCAA school I was taught to thrive on

by my head coach. Scholarships could be taken away if too much pain was experienced from an athlete, and work wasn't produced to show what I was signed full scholarship for)

(page 7 & 8)

I would get dizzy during practice from running

At the doctors for knee pain I experienced while working-out (basketball) doing some jumping exercises, leaping, diving, and jumping were required)

(page 17 & 18)

Back at the doctors office for having knee pain (in basketball once I step foot on court, I was taught by my coaches to always keep my knees bent to move faster in any direction when intended)

The doctors notes explanation jotted down on pp.1 isn't nothing compared to what I've experienced as an NCAA athlete. Those are just a few doctors notes from my injuries. Majorly my "doctor" was the schools trainer. The trainer gave the Coach the "OKs" for me to continue to play a sport, or back to playing a sport from health problems I experienced. Their decision was based off of background training, and the physical appearance of my injury. No x-ray or MRIs, depending on the situation.

I've gained arthritis in my knees while playing for the NCAA. Something that could have been preventing that would be allowing the trainer facility to have an MRI or X-Ray room, and allowing everyone to be on the same in-shape routine but on different levels. Everyone that signs with an NCAA school is different, meaning everyone's not in the same shape, and it takes time to get in good shape (depends what the Coach thinks good shape is), it can't happen in a week for me, which I felt like was the situation. (Example) for me, because I'm tall, I should not have to worry about in practice running in the gym under certain time limits (timing) in certain workout. Our body fat should be measured from multiple areas, my/our vertical, the trainers, or other employees should try their best to really understand each athlete.

Besides having head athletic trainers, there should be people that monitor all employees how they work. NCAA has a huge name in the world. Athletes are recruited from all around the world. My position (Center) is where I post up near the rim, and the objective is because the ball is near the rim, when I catch the basketball offensively, to try and make the basket in the rim, as the defensive increases. Anything is bound to happen. Majority of the time on the basketball court, I face the rim and try to push through my opponent to get to the rim, while other defenders try to come and defend. Look at my free throw percentages from both NCAA schools .

Free throws happen because someone is fouled, that person is allowed to shoot the shot from the free throw line without defense/contact. I've had many bruises all over my body from taking impacts to my body, many blows to my head, not to including having my lip busted open many times bleeding while performing for the NCAA. There are unlimited ways I got a concussions while playing in the NCAA whether it's going to steal

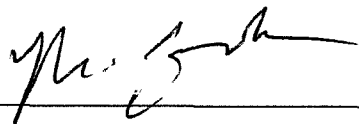

the basketball on the court during practice, or in a game having contact with the defender, rebounding the ball offensively, or defensively, or even having a turnover (when someone tries to steal the ball from me).

Statistics sheets do not include my first year, or any year listed with "the University of Hartford" as a red shirt alongside in practice (which was about five days out the week, four to five hours long. I had my chance of being televised through ESPN for the NCAA. Will the NCAA have their chance right now to compensate me for my injuries. As an ex-NCAA athlete who has, and still is experiencing side effects from playing in the NCAA such as having arthritis, and experiencing concussions for three years, I should be compensated for my injuries. I need help healing what has happened to me threw my playing career. I will attend the next Fairness Hearing if I can, once updated when it is, from the "National Collegiate Athletic Association Student-Athlete Concussion Injury Litigation" settlement group. If the settlement is passed, as an ex-NCAA athlete who has experienced these concussions and who is living with these side effects for who knows how long they lasts.).

It's a mess, and all I ask from the NCAA in return for my leadership of representing the NCAA well is to be **compensated** for my injuries. I never did any smoking, drinking, drugs, or involve any type of inappropriate behavior, but I need a sports psychologist, and sports therapist. In the amount of \$30,000 this would allow to help **me** better understand why I have anger problems (emotional) from having so many concussions while playing in the NCAA. The amount listed is beyond reasonable. Were talking about my life. Even after a hospital visit, the hospital reaches out, via mail, email, and/or phone to ask how the visit was and sometimes even rate a questionnaire about the visit to help better the company.

Everything listed on Pp.1 to Pp.3 is true:

Name: Malcolm Campbell

X 

23. How do I object to the Settlement?

If you do not exclude yourself from the Settlement Class, you may object to the Settlement or the award of Attorneys' Fees and Costs. The Court will consider your views. To object, you or your attorney must submit your written objection to the Court. The objection must include the following:

- ✓ The name of the case and multi-district litigation, *In re National Collegiate Athletic Association Student-Athlete Concussion Litigation*, Case No. 1:13-cv-09116;
- ✓ Your name, address, telephone number, and, if you are represented by counsel, the name, address and telephone number of your counsel;
- ✓ The name of the NCAA member school(s) at which you participated in NCAA-sponsored sport(s), the NCAA-sponsored sport(s) in which you participated and the years during which you participated;
- ✓ A written statement of your objections, including any facts or law you wish to bring to the Court's attention;
- ✓ Any other supporting papers, materials or briefs that you want the Court to consider in support of your objection;
- ✓ A statement of whether you intend to appear at the Fairness Hearing; and
- ✓ If you intend to appear at the Fairness Hearing through counsel, the identity of the attorney(s) representing you who will appear at the Fairness Hearing.

You must send via U.S. Mail copies of the objection to each of the following addresses, postmarked no later than March 10, 2017:

Clerk of Court ✓ United States District Court for the Northern District of Illinois 219 South Dearborn Street Chicago, IL 60604	Steve W. Berman, Esq. HAGENS BERMAN SOBOL SHAPIRO LLP ✓ 1918 Eighth Avenue Suite 3300 Seattle, Washington 98101 <i>Settlement Class Counsel</i>	Mark S. Mester, Esq. LATHAM & WATKINS LLP ✓ 330 North Wabash Avenue Suite 2800 Chicago, Illinois 60611 <i>Counsel for the NCAA</i>
---	---	---

The requirements to object to the Settlement are described in detail in the Second Amended Settlement Agreement in Section XIII(C).

24. How do I ask the Court to exclude me from the Settlement?

To exclude yourself from the Settlement (or "opt out" of the Settlement), you must mail a letter or other written document to the Notice Administrator. Your request for exclusion must include:

- Your name, address, and telephone number;
- The name of the NCAA member school(s) at which you participated in NCAA-sponsored sport(s), the NCAA-sponsored sport(s) in which you participated and the years during which you participated;
- A statement that "I wish to exclude myself from the Settlement Class in *In re National Collegiate Athletic Association Student-Athlete Concussion Litigation*, Case No. 1:13-cv-09116" (or substantially similar clear and unambiguous language); and,
- Your signature by hand (not any form of electronic signature), and the date on which you signed it (even if you are represented by an attorney).

You must mail your exclusion request, postmarked no later than March 10, 2017, to:

NCAA Student-Athlete Concussion Injury Litigation
Notice Administrator
c/o Gilardi & Co LLC
PO Box 43414
Providence, RI 02940-3414

Further, if you are a current NCAA student-athlete on or after six (6) months after the Effective Date and your school fails to put in place a concussion management plan within six (6) months of the Effective Date, you will have a second opportunity to opt-out so long as you do so within twelve (12) months of the Effective Date.

Exclusions, or opt-outs, shall be allowed on an individual basis only, and "mass" or "class" opt-outs are not allowed. If you do not timely submit an exclusion request including all of the above information, you will be bound by the Settlement and all of your claims for any of the Released Claims will be released. If you validly and timely request exclusion from the Settlement Class, you will not be bound by the Final Order and Judgment entered in this Litigation. Excluding yourself means you cannot receive any of the Settlement benefits or comment upon the Settlement, but you will be able to file a lawsuit on your own behalf.

Concussion or mild traumatic brain injury (mTBI) has been defined as “a complex pathophysiological process affecting the brain, induced by traumatic biomechanical forces.” Although concussions most commonly occur after a direct blow to the head, they can occur after a blow elsewhere in the body that transmits forces to the head. Sometimes, athletes refer to hits that result in concussions as getting “dinged” or having their “bell rung.”

According to the experts retained by Class Counsel and the Class Representatives, when a concussion occurs, there is a traumatically induced alteration of brain function that may include a rapid onset of cognitive impairment (e.g., impairment to the mental processes of perception, learning, memory, judgment, and reasoning). Most times, the short-term effects of the concussion spontaneously resolve.

Other concussion symptoms include: amnesia, confusion, nausea, loss of consciousness, balance problems or dizziness, double or fuzzy vision, sensitivity to light or noise, headache, feeling sluggish, foggy or groggy, feeling unusually irritable, concentration or memory problems, or slowed reaction time.

You may have suffered a concussion if you experienced any of these symptoms while playing an NCAA sport, even if you were not formally diagnosed with a concussion. You do **not** need to have lost consciousness to have suffered a concussion.

Top

7. What is a subconcussive hit?

Subconcussive hits, or impacts, do not produce any clinical concussion symptoms, but may adversely affect brain function in the same way symptomatic concussions do. Some published data reflecting high school and college football players who did not exhibit clinical signs of concussion and did not report symptoms of concussion but nonetheless had physiological and structural changes to the brain suggest the possibility that subconcussive hits can lead to changes in the brain that are similar to those observed in concussed players.

Top

8. Do concussions only occur in football?

Many people associate concussion with football. However, concussions can occur in any sport, including most often in a range of contact sports, including but not limited to men's and women's soccer, ice hockey, basketball, field hockey, lacrosse and wrestling.

LEFT KNEE 11-06-07

FINDINGS: Frontal view of both knees and lateral view of the left knee demonstrate no evidence of acute fracture or dislocation. Mild degenerative changes are noted in both knees with spurring of the tibial spines and slight mild narrowing of the medial joint compartment bilaterally. No suprapatellar joint effusion identified in the left knee.

IMPRESSION: No acute fracture or dislocation, mild degenerative changes of both knees particularly involving the medial joint compartment.
